Important Notes: For the first time in the evolution of Sins of a Solar Empire: Rebellion, the game can be played in landscape mode. In landscape mode, the grid size of the colony planet is significantly larger than the grid size in portrait mode. This should improve accessibility as well as immersion for new players and veterans alike. Additionally, the game now supports any resolution between 800x600 and 1920x1080. In landscape mode, the game will always run at 800x600. However, if you are using a standard monitor in portrait mode, the
